

Dear colleagues,

With pain and resentment we note that the governers of our country aggressively and without any justification attacked our neighbor country Ukraine - our brotherly people, with whom we have a thousand years of common history

We are against war. We clearly understand that nothing other than humanitarian catastrophe can be the result of it.

We feel shame for our governance, and while none of us has voted for these people, as citizens of our country, we can't evade this responsibility, we do apologize to all the world for this.

We are professionals who have in any circumstance to help people. We have to maintain our professional society and we do hope to maintain our professional connections with all of you.
